

# NSA™ (CF-1®) (Non-Swiss Albino - Carworth Farms-1)

## Hsd:NSA™(CF-1®)

The original breeding stock for this colony was obtained from a breeder whose stock has been used extensively in the early work with pneumococci. At Carworth Farms, this stock acquired the name CF No.1 (Carworth Farms #1).

From Charles River Laboratories, Wilmington, Massachusetts, to Harlan Laboratories. Harlan became Envigo in 2015, then Envigo was acquired by Inotiv in 2021.

### RESEARCH APPLICATIONS

The NSA(CF-1) mouse has been used for a wide variety of toxicity studies.

### CHARACTERISTICS

#### Behavior

NSA mice are relatively large and have a placid temperament, which makes them easy to handle.

#### Genetics

##### Coat color genes

- c : albino

Other genes are variable (outbred stock).

#### Infection

Its resistance to naturally occurring salmonella infections is markedly higher than that of other stocks or strains.
