

# Teklad Certified Diets

**Inotiv stocks Certified Diets for most species.  
Contact us for information, pricing and availability.**

Certified Diets ensure your study complies with the FDA's Good Laboratory Practices (GLP). Periodic feed analysis ensures that contaminants known to be capable of interfering with a study are not present above specified levels.

## SAMPLING, ANALYSIS, AND REPORTS

- Teklad Certified Diets are made using the same formulas and high-quality ingredients as noncertified diets. A "C" at the end of the product code indicates a certified diet.
- A sample representing every bag of a specific lot is analyzed by an independent laboratory for the environmental contaminants listed in the table. Samples are held for 18 months.
- The QA Coordinator reviews and signs the report, which certifies that the diet contains not more than the established maximum acceptable levels for these contaminants.
- These reports are shipped with the diet and made available to the customer.
- The report includes analysis for protein, fat, crude fiber and vitamin C for guinea pig and non-human primate diets.

## SPECIAL ASSAYS

- Specific environmental contaminants, when the entire profile is not required
- Additional assays to determine the levels of other environmental contaminants or nutrients not included in the standard profile

Any diet and most other products certified on request. (Additional lead time and charges will apply on non-stocked items.)

Certified Diets are stocked for most species.
